

## **ACTIVITY SHEET: PRELIMINARY HOME ENERGY EFFICIENCY AUDIT**

**Fill out this activity sheet as you conduct your own preliminary energy efficiency audit of your living space.**

**You will need:**

**XXXd thermometer**

How much does the temperature change around your door (s)? What do you notice?

How much does the temperature change around your window (s)? What do you notice? What patterns do you see?

Do you notice any changes in your living space when the weather changes (wind, rain, snow, etc)?

**Fill out this chart with information on the efficiency of the lights in your living space. Discover how to figure out if the lights in your living space are inefficient or not, and record your results here for each light bulb.**
